9.3.2	Long Wire and Off-Center-Fed Dipoles	34
9.3.3	Terminated Rhombic and Folded Dipoles	34
9.3.4	G5RV and Zepp Antennas	34
9.3.5	Extended Double Zepp and Polarization Effects	34
9.4	Antenna Insights	34
9.4.1	Parabolic Reflectors and Circular Polarization	34
9.4.2	Loading Coils and Electrically Short Antennas	34
9.4.3	Yagi Antennas and Radiation Resistance	34
9.5	Matching Antenna Mechanics	35
9.5.1	Gamma and Beta Matches	35
9.5.2	Q-Section and Wilkinson Divider	35
9.5.3	Shunt Feeding and Phasing Lines	35
9.6	Transmission Line Essentials	35
9.6.1	Velocity Factor and Electrical Length	35
9.6.2	Transmission Line Impedance	35
9.7	Charting Impedances	35
9.7.1	Smith Chart Basics	35
9.7.2	Smith Chart Components	35
9.8	Essential Antenna Design Insights	35
9.8.1	Beverage Antennas and Directivity	35

<i>CONTENTS</i>	7
9.8.2 Small-Loop and Sense Antennas	35
9.8.3 Cardioid Patterns and Loop Antennas	36
10 SUBELEMENT E0 - SAFETY	37
10.1 Related Principles	37
10.1.1 Grounding and RF Exposure	37
10.1.2 Microwave Hazards and MPE Limits	37
10.1.3 Tower Safety and SAR	37
10.1.4 RF Exposure Evaluations	37
10.1.5 Climbing Safety	37

Chapter 1

Commission Rules

1.1 Frequency Privileges and Signal Regulations

- Question IDs: E1A01, E1A02, E1A03, E1A04, E1A05, E1A06, E1A07, E1A08, E1A09, E1A10, E1A11

1.2 Station Restrictions and Special Operations

- Question IDs: E1B01, E1B02, E1B03, E1B04, E1B05, E1B06, E1B07, E1B08, E1B09, E1B10, E1B11

1.3 Automatic and Remote Control

- Question IDs: E1C01, E1C02, E1C03, E1C04, E1C05, E1C06, E1C07, E1C08, E1C09, E1C10, E1C11, E1C12

1.4 Amateur Space and Earth Stations

- Question IDs: E1D01, E1D02, E1D03, E1D04, E1D05, E1D06, E1D07, E1D08, E1D09, E1D10, E1D11, E1D12

1.5 Volunteer Examiner Program

- Question IDs: E1E01, E1E02, E1E03, E1E04, E1E05, E1E06, E1E07, E1E08, E1E09, E1E10, E1E11

Chapter 2

Operating Procedures

2.1 Miscellaneous Rules

- Question IDs: E1F01, E1F02, E1F03, E1F04, E1F05, E1F06, E1F07, E1F08, E1F09, E1F10, E1F11

2.2 Amateur Radio in Space

- Question IDs: E2A01, E2A02, E2A03, E2A04, E2A05, E2A06, E2A07, E2A08, E2A09, E2A10, E2A11, E2A12

2.3 Television Practices

- Question IDs: E2B01, E2B02, E2B03, E2B04, E2B05, E2B06, E2B07, E2B08, E2B09, E2B10, E2B11, E2B12

2.4 Contest and DX Operating

- Question IDs: E2C01, E2C02, E2C03, E2C04, E2C05, E2C06, E2C07, E2C08, E2C09, E2C10, E2C11, E2C12

2.5 Operating Methods: Digital Modes

- Question IDs: E2D01, E2D02, E2D03, E2D04, E2D05, E2D06, E2D07, E2D08, E2D09, E2D10, E2D11

2.6 Operating Methods: HF Digital Modes

- Question IDs: E2E01, E2E02, E2E03, E2E04, E2E05, E2E06, E2E07, E2E08, E2E09, E2E10, E2E11, E2E12, E2E13

Chapter 3

Radio Wave Propagation

3.1 Electromagnetic Waves and Specialized Propagation

- Question IDs: E3A01, E3A02, E3A03, E3A04, E3A05, E3A06, E3A07, E3A08, E3A09, E3A10, E3A11, E3A12, E3A13, E3A14

3.2 Transequatorial and Long-Path Propagation

- Question IDs: E3B01, E3B02, E3B03, E3B04, E3B05, E3B06, E3B07, E3B08, E3B09, E3B10, E3B11, E3B12, E3B13

3.3 Propagation Prediction and Reporting

- Question IDs: E3C01, E3C02, E3C03, E3C04, E3C05, E3C06, E3C07, E3C08, E3C09, E3C10, E3C11, E3C12

Chapter 4

Amateur Practices

4.1 Test Equipment

4.1.1 Oscilloscopes

- Question IDs: E4A01, E4A04, E4A06, E4A09, E4A10

4.1.2 Spectrum Analyzers

- Question IDs: E4A02, E4A03

4.1.3 Antenna Analyzers

- Question IDs: E4A07, E4A08, E4A11

4.1.4 Frequency Counters

- Question IDs: E4A05

4.2 Measurement Techniques and Limitations

- Question IDs: E4B01, E4B02, E4B03, E4B04, E4B05, E4B06, E4B07, E4B08, E4B09, E4B10, E4B11

4.3 Receiver Performance

- Question IDs: E4C01, E4C02, E4C03, E4C04, E4C05, E4C06, E4C07, E4C08, E4C09, E4C10, E4C11, E4C12, E4C13, E4C14

4.4 Receiver Performance Characteristics

- Question IDs: E4D01, E4D02, E4D03, E4D04, E4D05, E4D06, E4D07, E4D08, E4D09, E4D10, E4D11, E4D12, E4D13, E4D14

4.5 Noise and Interference

- Question IDs: E4E01, E4E02, E4E03, E4E04, E4E05, E4E06, E4E07, E4E08, E4E09, E4E10, E4E11, E4E12, E4E13, E4E14

Chapter 5

Electrical Principles

5.1 Resonance and Q

- Question IDs: E5A01, E5A02, E5A03, E5A04, E5A05, E5A06, E5A07, E5A08, E5A09, E5A10, E5A11, E5A12, E5A13

5.2 Time Constants and Phase Relationships

- Question IDs: E5B01, E5B02, E5B03, E5B04, E5B05, E5B06, E5B07, E5B08, E5B09, E5B10, E5B11, E5B12

5.3 Coordinate Systems and Phasors

- Question IDs: E5C01, E5C02, E5C03, E5C04, E5C05, E5C06, E5C07, E5C08, E5C09, E5C10, E5C11, E5C12

5.4 RF Effects in Components and Circuits

- Question IDs: E5D01, E5D02, E5D03, E5D04, E5D05, E5D06, E5D07, E5D08, E5D09, E5D10, E5D11, E5D12

Chapter 6

Circuit Components

6.1 Semiconductor Materials and Devices

- Question IDs: E6A01, E6A02, E6A03, E6A04, E6A05, E6A06, E6A07, E6A08, E6A09, E6A10, E6A11, E6A12

6.2 Diodes

6.2.1 Zener Diodes

- Question IDs: E6B01, E6B03

6.2.2 Schottky Diodes

- Question IDs: E6B02, E6B06, E6B08

6.2.3 Varactor Diodes

- Question IDs: E6B04

6.2.4 PIN Diodes

- Question IDs: E6B05, E6B11

6.2.5 Point-Contact Diodes

- Question IDs: E6B09

6.2.6 Diode Applications

- Question IDs: E6B07, E6B10

6.3 Digital ICs

6.3.1 Logic Gates

- Question IDs: E6C07, E6C08, E6C10, E6C11

6.3.2 Comparators and Hysteresis

- Question IDs: E6C01, E6C02

6.3.3 Tri-State Logic

- Question IDs: E6C03

6.3.4 BiCMOS Logic

- Question IDs: E6C04

6.3.5 CMOS Logic

- Question IDs: E6C05, E6C06

6.3.6 Field-Programmable Gate Arrays (FPGAs)

- Question IDs: E6C09

6.4 Inductors

6.4.1 Core Materials and Permeability

- Question IDs: E6D04, E6D05, E6D06, E6D08, E6D10, E6D11, E6D12

6.4.2 Transformers

- Question IDs: E6D07

6.4.3 Ferrite Beads and Parasitic Suppression

- Question IDs: E6D09

6.5 Piezoelectricity

6.5.1 Piezoelectric Effect

- Question IDs: E6D01, E6D03

6.5.2 Quartz Crystals

- Question IDs: E6D02

6.6 Semiconductor Materials and Packages for RF Use

- Question IDs: E6E01, E6E02, E6E03, E6E04, E6E05, E6E06, E6E07, E6E08, E6E09, E6E10, E6E11, E6E12

6.7 Electro-Optical Technology

- Question IDs: E6F01, E6F02, E6F03, E6F04, E6F05, E6F06, E6F07, E6F08, E6F09, E6F10, E6F11

Chapter 7

SUBELEMENT E7 - PRACTICAL CIRCUITS

7.1 Digital Circuit Essentials

7.1.1 Introduction to Digital Circuits

7.1.2 Bistable Circuits

- E7A01

7.1.3 Counters and Frequency Division

- E7A02, E7A03, E7A04

7.1.4 Multivibrators

- E7A05, E7A06

7.1.5 Logic Gates

- E7A07, E7A08, E7A09

7.1.6 Truth Tables and Positive Logic

- E7A10, E7A11

7.2 Amplifier Basics

7.2.1 Class AB and Class D Amplifiers

- E7B01, E7B02

7.2.2 RF Switching Amplifiers

- E7B03

7.2.3 Class A Amplifiers

- E7B04

7.2.4 Oscillations and Grounded-Grid Amplifiers

- E7B05, E7B06

7.2.5 Class C Amplifiers and Efficiency

- E7B07, E7B08

7.2.6 Emitter Followers and Biasing

- E7B09, E7B10, E7B11, E7B12

7.3 Network Element Configurations

7.3.1 Low-Pass and High-Pass Filters

- E7C01, E7C02

7.3.2 Pi-L Networks and Impedance Matching

- E7C03, E7C04

7.3.3 Filter Types

- E7C05, E7C06, E7C07

7.3.4 Helical and Crystal Lattice Filters

- E7C08, E7C09

7.3.5 Cavity Filters and Shape Factor

- E7C10, E7C11

7.4 Voltage Regulator Mechanics

7.4.1 Linear and Switchmode Regulators

- E7D01, E7D02

7.4.2 Voltage References and Three-Terminal Regulators

- E7D03, E7D04, E7D05

7.4.3 Linear Voltage Regulator Circuits

- E7D06, E7D07, E7D08

7.4.4 Battery Operating Time and Power Supplies

- E7D09, E7D10

7.4.5 Solar Panel Inverters and Dropout Voltage

- E7D11, E7D12

7.4.6 Power Dissipation and Filter Capacitors

- E7D13, E7D14, E7D15

7.5 Radio Communication Essentials**7.5.1 FM Signal Generation and Reactance Modulators**

- E7E01, E7E02

7.5.2 Frequency Discriminators and SSB Signals

- E7E03, E7E04

7.5.3 Pre-emphasis and De-emphasis

- E7E05, E7E06

7.5.4 Baseband and Mixers

- E7E07, E7E08, E7E09

7.5.5 Detectors and Demodulation

- E7E10, E7E11

7.6 Key Terms in Software-Defined Radio and Digital Signal Processing

7.6.1 Direct Sampling and Adaptive Filters

- E7F01, E7F02

7.6.2 Hilbert-Transform Filters and SSB Generation

- E7F03, E7F04

7.6.3 Sampling and Fast Fourier Transform

- E7F05, E7F06, E7F07

7.6.4 Decimation and Anti-Aliasing Filters

- E7F08, E7F09

7.6.5 SDR Bandwidth and Signal Level

- E7F10, E7F11

7.6.6 FIR Filters and Taps

- E7F12, E7F13, E7F14

7.7 Op-Amp Essentials

7.7.1 Op-Amp Characteristics

- E7G01, E7G03, E7G04

7.7.2 Op-Amp Filters and Stability

- E7G02, E7G05

7.7.3 Gain-Bandwidth and Voltage Gain

- E7G06, E7G07, E7G08, E7G09, E7G10, E7G11

7.7.4 Operational Amplifier Definition

- E7G12

7.8 Oscillator Insights

7.8.1 Oscillator Circuits

- E7H01

7.8.2 Microphonics and Phase-Locked Loops

- E7H02, E7H03

7.8.3 Colpitts and Pierce Oscillators

- E7H04, E7H05

7.8.4 Frequency Synthesis and Direct Digital Synthesizers

- E7H06, E7H09, E7H10, E7H11

7.8.5 Crystal Oscillators and Stability

- E7H07, E7H08, E7H12, E7H13

Chapter 8

SUBELEMENT E8 - SIGNALS AND EMISSIONS

8.1 Signal Processing Essentials

8.1.1 Fourier Analysis and Analog-to-Digital Conversion

- E8A01, E8A02

8.1.2 Time Domain and Dither

- E8A03, E8A04

8.1.3 RMS Measurements and PEP-to-Average Power

- E8A05, E8A06, E8A07

8.1.4 Direct Sampling and Resolution

- E8A08, E8A09, E8A10

8.1.5 Total Harmonic Distortion

- E8A11

8.2 Modulation Secrets Revealed

8.2.1 FM Modulation Index and Deviation Ratio

- E8B01, E8B02, E8B03, E8B04, E8B05, E8B06, E8B09

8.2.2 Orthogonal Frequency-Division Multiplexing

- E8B07, E8B08

8.2.3 Frequency Division Multiplexing

- E8B10, E8B11

8.3 Transmission Insights

8.3.1 Quadrature Amplitude Modulation

- E8C01

8.3.2 Symbol Rate and PSK Signals

- E8C02, E8C03, E8C04

8.3.3 Bandwidth of Various Signals

- E8C05, E8C06, E8C07

8.3.4 Error Correction and Digital Codes

- E8C08, E8C09, E8C10

8.3.5 Baud Rate and CW Signal Bandwidth

- E8C11, E8C12

8.3.6 Constellation Diagrams and Mesh Networks

- E8C13, E8C14, E8C15

8.4 Spread Spectrum Unveiled

8.4.1 Spread Spectrum Techniques

- E8D01, E8D02, E8D03

8.4.2 Key Clicks and Parity Bits

- E8D04, E8D05, E8D06

8.4.3 AFSK Signals and Distortion

- E8D07, E8D08, E8D09

8.4.4 Baudot and ASCII Codes

- E8D10, E8D11

Chapter 9

SUBELEMENT E9 - ANTENNAS AND TRANSMISSION LINES

9.1 Antenna Essentials

9.1.1 Isotropic Radiators and Effective Radiated Power

- E9A01, E9A02, E9A03

9.1.2 Feed Point Impedance and Ground Gain

- E9A04, E9A05

9.1.3 Antenna Efficiency and Ground Losses

- E9A06, E9A07, E9A09, E9A10, E9A11

9.1.4 Gain Comparison and Fresnel Zones

- E9A08, E9A12

9.2 Antenna Patterns Unveiled

9.2.1 Beamwidth and Front-to-Back Ratio

- E9B01, E9B02, E9B03, E9B04

9.2.2 Elevation Patterns and Far Field

- E9B05, E9B06, E9B07, E9B08

9.2.3 Method of Moments Analysis

- E9B09, E9B10, E9B11

9.3 Antenna Patterns and Impedances

9.3.1 Radiation Patterns of Vertical Antennas

- E9C01, E9C02, E9C03

9.3.2 Long Wire and Off-Center-Fed Dipoles

- E9C04, E9C05

9.3.3 Terminated Rhombic and Folded Dipoles

- E9C06, E9C07, E9C08

9.3.4 G5RV and Zepp Antennas

- E9C09, E9C10

9.3.5 Extended Double Zepp and Polarization Effects

- E9C11, E9C12, E9C13, E9C14

9.4 Antenna Insights

9.4.1 Parabolic Reflectors and Circular Polarization

- E9D01, E9D02

9.4.2 Loading Coils and Electrically Short Antennas

- E9D03, E9D04, E9D05, E9D06, E9D07, E9D08, E9D09, E9D10

9.4.3 Yagi Antennas and Radiation Resistance

- E9D11, E9D12

9.5 Matching Antenna Mechanics

9.5.1 Gamma and Beta Matches

- E9E01, E9E02, E9E03, E9E04, E9E05

9.5.2 Q-Section and Wilkinson Divider

- E9E06, E9E07, E9E08

9.5.3 Shunt Feeding and Phasing Lines

- E9E09, E9E11

9.6 Transmission Line Essentials

9.6.1 Velocity Factor and Electrical Length

- E9F01, E9F02, E9F03

9.6.2 Transmission Line Impedance

- E9F04, E9F05, E9F06, E9F07, E9F08, E9F09, E9F10, E9F11, E9F12

9.7 Charting Impedances

9.7.1 Smith Chart Basics

- E9G01, E9G02, E9G03, E9G04, E9G05

9.7.2 Smith Chart Components

- E9G06, E9G07, E9G08, E9G09, E9G10, E9G11

9.8 Essential Antenna Design Insights

9.8.1 Beverage Antennas and Directivity

- E9H01, E9H02, E9H03, E9H06, E9H07

9.8.2 Small-Loop and Sense Antennas

- E9H04, E9H05, E9H08

9.8.3 Cardioid Patterns and Loop Antennas

- E9H09, E9H10, E9H11

Chapter 10

SUBELEMENT E0 - SAFETY

10.1 Related Principles

10.1.1 Grounding and RF Exposure

- E0A01, E0A02, E0A03, E0A04

10.1.2 Microwave Hazards and MPE Limits

- E0A05, E0A06

10.1.3 Tower Safety and SAR

- E0A07, E0A08

10.1.4 RF Exposure Evaluations

- E0A09, E0A10

10.1.5 Climbing Safety

- E0A11, E0A12
